Testimonials from Exhibitors

• BBC Chartering China

Johnny Shao

Managing Director

This year's WBX was a real success. The number and quality of visitors at this exhibition far exceeded our expectations – it was the best exhibition we have attended in recent years. In terms of new customers, most of the people who came to our booth were from the energy storage cabinet sector – a promising area in the industry. Major players like BYD, CATL, and Huawei were all there, which was hugely helpful for our business.

• BLG Gdansk

Mateusz Chajewski

Development and Strategy Manager

This is the perfect place to meet and discuss business. We have held many very fruitful meetings, and I am glad we are attending. From the first day, we held nearly a hundred meetings starting at 9 a.m. Visitors came to learn about our location, capabilities, and services for Chinese customers.

• Port of Antwerp-Bruges

Jan Van der Borcht

Economic Diplomatic Advisor to the Belgian Embassy in Beijing, Port Representative

Over the years we've seen WBX develop and grow, bigger and more international than last year. We had no doubt it would be a success, and we're grateful for WBX support. This is for professionals, specifically for the breakbulk industry—not a generic exhibition. It focuses deeply, so visitors are highly relevant. We don't waste time and get valuable contacts.

• ALPORT

Mustafa Levent Adali

General Manager of Alport

This is our first year attending this fair. We did not expect so much attention. We are surprised and happy with the interest from visitors. China is Africa's biggest supplier, so being here is our strategic target.

Our overall impression of WBX has been tremendously fantastic. We received far more interest than we imagined before coming here.
